DETAILED ACTION

1. **THE FINALITY OF THE LAST OFFICE ACTION IS HEREBY VACATED.**
2. Applicants' Response to Office Action, received 11 March 2008, is acknowledged. Claims 6, 7, 22, 23, and 25 have been amended.
3. Claims 5-23, 25, and 29-33 are pending and under consideration.

Rejection Withdrawn

4. The rejection of claims 6, 14-20, 22, 23, 25, and 29-33 under 35 U.S.C. 112, first paragraph, scope of enablement for humanized mouse antibodies which bind specifically to VT2 and/or VT2 variant, is withdrawn in light of the amendment of the claims.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 7-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The claims are drawn to a humanized antibody which binds to verotoxin II with an affinity constant between 10^7 M^{-1} and ten-fold the affinity of the mouse antibody deposited as Accession No. FERM BP-10877.

The specification does not contain sufficient support for the range of the claimed affinity of the antibody. The only example of affinity binding characteristics is Example 9, which shows affinity binding which is almost identical between the only two antibodies tested.

The specification does not teach the claimed affinity range of the instant claims, and, thus, does not reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Conclusion

7. Claims 7-10 are rejected.
